Advanced Multimedia Solutions is the coulee regions premiere technology integrator. If you have technology needs, big or small, our company will work with you to develop a plan that satisfies your requirements. As we continue to grow our focus remains on quality work done on time and on budget with a helpful smile and positive attitude. Advanced Multimedia Solutions loves technology and we want you to love it too.

We ensure that our team fully understands the lifestyle and interest of our clients so that we can create the best user experience possible and take full advantage of the technology available today.

S o l u t i o n s

Residential & Commercial: At Advanced Multimedia Solutions we are able to bring the latest technology to your home, office or small business and deliver the best user experience possible. We are always looking for new and exciting ways to implement technology solutions into new and existing projects.

Home Theater & Media Rooms: Whether you're looking for a theme theatre, traditional theatre, or a family room that doubles as a media room Advanced Multimedia Solutions can help. From a basic 2 speaker system to an advanced 7.1 THX® surround sound with cinema-quality sound, we're the experts you can count on to bring your dreams to life.

Smart Remotes: Simplify Your Life with a Smart Remote from Advanced Multimedia Solutions. We take great pride in programming your Smart Remote to be easy to use and not cause headaches when trying to use your system.

Home Automation: The idea of home automation is not new; what is new is the fact that home automation is available to a wider variety of project sizes, scopes and budgets than ever before. The "Jetson's" lifestyle is available today and Advanced Multimedia Solutions is your source.

Distributed Audio/Video: Audio/Video sources can be centrally located in your home or business to allow easy access through keypads, touch panels, remote controls and more. This allows a consistent and easy-to-use interface for anyone that wants to access the system.

Structured Wiring & Networking: Implementing a certified and capable network ensures reliability and future expansion options. You can count on Advanced Multimedia Solutions to properly prepare for future plans and dreams.

Lighting Control: A well designed lighting system can set the mood for your party, backyard gathering or an evening at home. Advanced Multimedia Solutions gives you the power to control a pre-programmed solution with the push of a single button or we can make things happen automatically without even thinking about it.

Energy Management: It only makes sense that by combining some or all of the available technologies that we offer, you are able to conserve energy and do your part in the "green" movement. Utilizing technology available today we are able to make this happen without adding extra steps to your life or taking away from precious family time.

Media Servers & PC's: Centralized media servers can be networked, allowing family members to archive music and movie collections; while accessing these collections from PC's or other networked media devices.

Installation & Service: All of our jobs are completed on time and on budget. All of our installations are also guaranteed and we offer available 24/7/365 Technical Support.

Advanced Multimedia Solutions was formed with over two decades of combined experience in the consumer electronics industry. The Team has come together to create a company that has the knowledge to *Connect Your Digital Lifestyle* and consistently deliver the very best user experience possible. Utilizing our experience, knowledge and many industry certifications, we are able to design and build systems to fit a wide array of project sizes, budgets and lifestyles.
